PROFILE

Web Development graduate with a **3.5 GPA** and hands-on experience across two stacks. On the Java side: completed multiple courses covering **Spring Boot, Spring Cloud, microservices, and Angular**, and applied them on a live SaaS project. On the JavaScript side: built a full fitness management platform using **Vue 3 and Laravel** with AI chat integration via Gemini. I use AI tools as an active part of my workflow — for architecture decisions, code review, and debugging, not just code generation.

SKILLS

Frontend	Angular, Vue 3, TypeScript, Pinia, JavaScript, HTML5, CSS3
Backend	Spring Boot, Java, Spring Cloud, Laravel 11, PHP, REST APIs, JWT
Architecture	Microservices, API Gateway, Service Discovery, RBAC, Multi-tenancy
Database	Oracle SQL, MySQL, PostgreSQL, schema design
Web & Delivery	Astro, Cloudflare Workers, technical SEO, JSON-LD, i18n / RTL, Core Web Vitals
Tools	Docker, Git, GitHub, Composer, npm
AI & Workflow	Gemini API, Claude Code, prompt engineering, AI-assisted development

PROJECTS

Muscle Hub

2025 – 2026

Fitness management platform — Vue 3 + Laravel 11 + MySQL

Full gym management system across **14 pages** backed by **12 database tables**. Built member registration, subscription tracking, workout logging, and a role system for admins, trainers, and members. Integrated a **Gemini-powered AI assistant** that holds conversation context across 9 messages. Includes full **RTL layout** and bilingual Arabic/English interface.

TypeScript

Pinia

Laravel 11

MySQL

Gemini API

JWT

RBAC

RTL / i18n

Werd Platform

2026

SaaS for Quran circle management — Angular 21 + Spring Boot microservices

Multi-tenant platform for mosque-based Quran memorization programs. Backend runs as **6 independent microservices** behind an API gateway with JWT role enforcement across 6 access levels. Expanded my hands-on exposure to **Java, Spring Cloud, and Docker Compose**.

Spring Boot

Java

PostgreSQL

Docker

Microservices

Khabab Academy — Landing Page

2026

Marketing page for a horse riding academy in Riyadh

Built and optimized a static landing page: full **SEO setup** (JSON-LD structured data, Open Graph, hreflang), CSP headers, Core Web Vitals tuning, and floating WhatsApp CTA.

Chang Parts

2026

Bilingual auto-parts storefront — Astro + Cloudflare Workers

Static Arabic/English storefront for Changan spare parts covering **10 car models across 6 part categories**, designed as a **WhatsApp-first ordering flow**: every CTA opens a pre-filled message capturing model, year, and VIN before the conversation starts. **Adapts to the visitor's device** — dark/light driven entirely by the OS setting in CSS, and an **Accept-Language edge redirect** that routes to the Arabic or English site. Shipped with **AutoPartsStore, FAQPage and ItemList JSON-LD**, hreflang-mirrored AR/EN routes with full RTL, and edge-served pages with inlined CSS and per-locale font subsetting.
